ELITE

SC-07

RS232C Protocol

August 2008

For Custom Installation

Physical Cable Connection

Connector

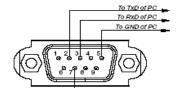

RS232C DB9 Male

Pioneer A/V Receivers use a "crossover" (aka/"null modem" or "twisted pair") cable.

Pin	AV Receiver		Pin	Computer	/Controller
1	*1		1	*1	
2	RXD	★	2	RXD	
3	TXD	***	3	TXD	
4	*1		4	*1	
5	GND	\leftarrow	5	GND	
6	*1		6	*1	
7	NC		7	NC	
8	NC		8	NC	
9	NC		9	NC	

*PinS 1, 4, & 6 are shorted to each other

RECEIVER PINOUTS

Communication

Communication Speed: 9600bps

Protocol Type: 8data bits,1stop bit,no parity

Notice1

To meet stringent power conservation measures Pioneer A/V receivers consume less than 1 Watt when in the "Standby" or "Off" mode.

To achieve this the main CPU doesn't operate in Standby/Off.

For this reason the receiver may not understand the first command send to it's the RS-232C port but the main CPU will "wake up" with the first command.

In other words, the receiver is using the first command as a trigger to wake up the main CPU and may not respond correctly to it.

For the proper execution of the first command please send the command twice.

Also, please make sure to have at least a 100msec. interval between the first and second command.

Example1

Notice2

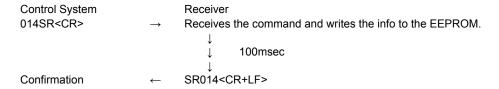

It takes a brief amount of time for the receiver to respond to a command like "Surround Mode" from your control system.

When the receiver receives a command it writes that information to the EEPROM.

Accordingly, you have to keep at least 100msec. before you do a "TIMEOUT" after sending the command to the receiver.

Example2

SR: The receiver's response to the command for PRO LOGIC II MUSIC.

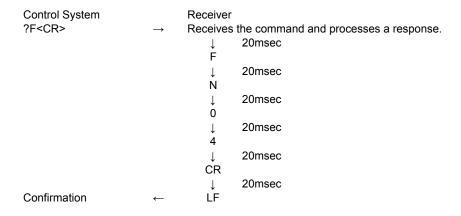

Notice3

The interval between each response sent from the receiver is 20msec.

Therefore you have to wait at least 20msec. before a "TIMEOUT".

Example3

?F: Responding to a request for the current function (input).

Automatic Feedback

When the customer changes the status using knobs on the front panel or the remote controller of the AV receiver, the AV receiver will send the new status automatically. (VOLXX,PQRX,MUTX,FNXX,SRXXXX,LMXXX)

(For example) The user changes function on the front panel. We send : FNXX<CR+LF>

All commands and requests must be followed by a Carriage Return <CR>.

X:Argument:ASC code

Command	Command Name	Argument	operation	Answer
?V <cr></cr>	VOLUME LEVEL STATUS REQUEST		Return the VOLUME LEVEL	VOLXX <cr+lf> *1</cr+lf>
?P <cr></cr>	POWER STATUS REQUEST		Return the POWER status	PWRX <cr+lf> *2</cr+lf>
?M <cr></cr>	MUTE STATUS REQUEST		Return the MUTE status	MUTX <cr+lf> *2</cr+lf>
?F <cr></cr>	FUNCTION MODE REQUEST		Return the FUNCTION MODE	FNXX <cr+lf> *3</cr+lf>
?S <cr></cr>	LISTENING MODE SETTING REQUEST		Return the L.M SETTING	SRXXXX <cr+lf> *4</cr+lf>
?L <cr></cr>	LISTENING MODE REQUEST		Return the L.M	LMXXX <cr+lf> *5</cr+lf>
?TO <cr></cr>	TONE STATUS REQUEST		Return the TONE status	TOX <cr+lf> *6</cr+lf>
?BA <cr></cr>	BASS STATUS REQUEST		Return the BASS Level	BAXX <cr+lf> *7</cr+lf>
?TR <cr></cr>	TREBLE STATUS REQUEST		Return the TREBLE Level	TRXX <cr+lf> *8</cr+lf>
?PR <cr></cr>	TUNER PRESET REQUEST		Return the PRESET number	PRXXX <cr+lf> *9</cr+lf>
?FR <cr></cr>	TUNER FREQ REQUEST		Return the FREQ number	FRXXXXXX <cr+lf> *10</cr+lf>

*4 LISTENING MODE SET, LISTENING MODE SETTING REQUEST[4byte]

When you set the "Listening Mode" with the product front panel keys and knobs, you operate the "LISTENING MODE SELECTOR" knob with "LISTENING CH SELECT" button. There are some modes which are not available depending on the source signal. There is automatic detection for 2ch and Multi-channel, though some modes override auto detection.

With the "SR" command, you can select whichever mode you wish. Also, you can confirm your selection with the "?S" command.

*) When the LISTENING MODE is changed, the receiver will automatically send an ANSWER to let the external controller know the current status without a LISTENING MODE SETTING REQUEST command having to be sent (Automatic Feedback [1-3byte]:data for mode setting. Indicating below the combination of modes selected by LISTENING MODE Example

Command 0001SR-CR>

set STEREO mode.

Answer SR0001<CR+LF>
Answer LM130<CR+LF>
Command ?S<CR>
Answer SR0031<CR+LF>

set STEREO mode. now become STEREO mode. now 96kHz STEREO play. now LISTENNING mode? now ACTION mode.

	All commands and requests must be followed by a Ca	rriage Return <cr></cr>

*5 LISTENING (DECODE) MODE REQUEST[3byte]

The list below indicates the combination of the LISTENING MODE selected by "SR" command and the LISTENING MODE determined by the input source signal.

*) When the LISTENING MODE is set and the format for the source signal is confirmed, the set will send an ANSWER COMMAND to the external controller to let it know the status of the LISTENING MODE. It replies automatically and does not need to receive a LISTENING MODE Request (Automatic Feedback).

LISTENING MODE shows the current signal format the set is receiving or surround mode which has been added to the original signal. LM***
